IMPORTANT INFORMATION REGARDING EWS1 FORM:*

To our understanding, the block management company, Residential Management Group (RMG), are currently in the PRE-TENDER SUPPORT stage of applying for BSF to maintain the required regulations. This is the application process for planning permissions and funding to assess and change the cladding/exterior of the building. The EWS1 form is a certificate that is issued upon the completion of this process meaning that until the process is completed, the EWS1 form will not be issued.

RMG have confirmed that "the Pre-Construction Services Agreement (PCSA) has been entered into by the contractor and the Landlord [Freeholder]

You can find more information regarding this on the GOV website:

<https://www.gov.uk/guidance/building-safety-fund-process-guide-for-residents#work-completion>

The Vendor has received the following information regarding the cladding;

"For The Litmus Building we are aware that there are elements of combustible cladding and insulation. A full investigation is ongoing, and we continue to liaise with the Landlord and the Building Safety Fund to expedite funding as soon as possible. As soon as we have further information relating to this, we will of course write to you to provide an update. You should however be aware that there will be a sustained period where noisy internal and external works will be taking place and you should expect some disruption to your environment, likely between the hours of 8am and 4pm. As we know more about the programme of works for The Litmus Building, we will of course write to you further.

Please note, it will not always be possible to consult on certain decisions which are determined/advised on by competent third parties such as the Fire and Rescue Service or specialist consultants. RMG will do all they can to explain the rationale behind decisions to you."

KEY UPDATES NOVEMBER 2025

RMG provided the following update to all leaseholders on 05/11/2025.

"PCSA Agreement:

The Pre-Construction Services Agreement (PCSA) is now in the final stages of negotiation. Once executed, this will formally initiate the next phase of site investigations and remediation design finalisation.

Opening-Up Works:

Preparations are underway for opening-up works, which will commence immediately after the PCSA is signed. These investigations are essential to validate the design and ensure all necessary remediation elements are captured.

Gateway 2 Submission:

The project team continues to compile the full suite of documentation required for the Gateway 2 application. Coordination between the contractor, design team, and BSR Principal Designer remains ongoing to ensure alignment on programme and deliverables.

Next Steps

Execute the PCSA agreement

Begin opening-up investigations

Finalise and submit the Gateway 2 application - targeted for submission by the end of March 2026

Prepare the full works and cost schedule for submission to the CSS expected the end of March 2026

Estimated Start on Site date: 16th October 2026

Please note that all dates remain indicative and subject to change as the project progresses."
